

TYRO REMOTES VERSATILITY MEETS RELIABILITY

High-quality remote controls for professional use

“Tyro Remotes” develops and produces professional wireless remote controls. Our goal is to provide high-quality wireless remote controls suitable for your specific needs in many sectors: automotive, industrial, agricultural, forestry, indoor-infra and maritime. Every day we work hard to optimize our specialty: compact, reliable push-button remote controllability for professional use. The satisfaction of our customers is very important to us and plays a central role in our organization.

Safe and reliable

Safety, reliability and functionality are the most important core values of Tyro’s product range, which is why Tyro keeps its R&D, service and production in-house in The Netherlands. All our professional wireless systems are tested to resist heavy duty usage in extreme working conditions. The products are certified according to ISO 9001:2000 quality management system. Tyro Remotes is the only supplier with EMC-e5 certification hence, a Tyro remote meets the European directives and can be used on the public highway.

Customised Solutions

The standard Tyro products can be delivered straight away 99% of the time. Thanks to the centralisation of the company activities, a customised solution can be made for you efficiently and reliably. We’re happy to assist you in finding a suitable solution for your specific application.

Award

Tyro Remotes has recently won the WTC Twente Export Award 2010. The awards company praised our excellent online strategy and the fact that we have a salesforce comprised of native speakers of multiple languages (Dutch, English, French and German).
