

FORNAX BASIC SAFE

THE FORNAX BASIC SAFE, PROFESSIONAL AND SAFE

The Fornax Basic-Safe offers every forester a reliable remote control with practical tumblers and one emergency stop button. The transmitter has an extremely sturdy case, guaranteeing a long life.

The transmitter is always ready to use thanks to the use of a standard 9V battery. The handy battery indicator with its clear LED indicates well in advance that the battery is nearly empty. Thanks to the extremely low power consumption, the battery will last at least one season.

The most important functions, pulling and veering in and out are to hand, as are the 'emergency call' function for e.g. a horn or a rotating beacon. With the Fornax Basic you can winch professionally and safely, with no fuss.

- Emergency stop button
- Clear and simple at a competitive price
- Work without having to recharge regularly
- Clear 'battery nearly empty' indicator
- Range in the forest 100-200 meters
- Compact, lots of freedom to move around
- Electronics protected from damp and cleaning products
- Long life thanks to sturdy casing
- Tyro RTT transmission technology - work side by side trouble-free

TECHNICAL SPECIFICATIONS

Function keys	Pulling, veering in and out cable (after 3 sec. flip/flop veering)
Safety keys	On, off, active emergency call (activate horn or rotating beacon), hard emergency stop
